**Formulated for maturing skin,
this AHA and anti-oxidant peel
improves surface texture,
including fine lines and
wrinkles, and promotes
a bright, even skin tone**

PCA skin[®]

Perfecting Peel

Improve skin tone, clarity and texture with this chemical peel formulated with mandelic acid, lactic acid and antioxidants.

20% mandelic

- An AHA with benefits for enhanced exfoliation that has also been shown to be beneficial for evening skin discoloration.

10% Lactic acid

- An AHA that not only loosens desmosomes to encourage exfoliation but also contributes to the skin's natural moisturizing factor (NMF) in its lactate ion form.

Emblica

- An antioxidant that supports clearing discoloration.

Silymarin

- A potent antioxidant that has also shown benefits for evening the skin tone
